

**DRAFT**  
**REMEDIAL INVESTIGATION REPORT**

**BERRY'S CREEK STUDY AREA**  
**REMEDIAL INVESTIGATION**

*Submitted to*

**U.S. Environmental Protection Agency**

*Submitted by*

**Berry's Creek Study Area Cooperating PRP Group**

March 2016

### **Report Contributors**

This remedial investigation report was prepared by Integral Consulting Inc. (Integral), The ELM Group (ELM), and Geosyntec Consultants (Geosyntec). The Technical Committee of the Berry's Creek Study Area Cooperating PRP Group also provided input and contributed to the document preparation.

## TABLE OF CONTENTS

EXECUTIVE SUMMARY .....	<b>Error! Bookmark not defined.</b>
SECTION 1 Introduction.....	<b>Error! Bookmark not defined.</b>
1.1 Statement of Purpose .....	<b>Error! Bookmark not defined.</b>
1.2 Site Setting.....	<b>Error! Bookmark not defined.</b>
1.3 Scope and Focus of Site Investigations .....	<b>Error! Bookmark not defined.</b>
1.4 Report Organization.....	<b>Error! Bookmark not defined.</b>
SECTION 2 Overview and Synthesis of Key Findings..	<b>Error! Bookmark not defined.</b>
2.1 Sources and COPCs .....	<b>Error! Bookmark not defined.</b>
2.2 Physical System .....	<b>Error! Bookmark not defined.</b>
2.3 Chemical Distribution and Fate .....	<b>Error! Bookmark not defined.</b>
2.4 Receptors .....	<b>Error! Bookmark not defined.</b>
2.5 Summary.....	<b>Error! Bookmark not defined.</b>
SECTION 3 Study Area Investigation.....	<b>Error! Bookmark not defined.</b>
3.1 Scoping Activities (2007–2008) .....	<b>Error! Bookmark not defined.</b>
3.2 Phase 1 (2009–2010) .....	<b>Error! Bookmark not defined.</b>
3.3 Phase 2 (2010–2011) .....	<b>Error! Bookmark not defined.</b>
3.4 Phase 3 (2012–2015) .....	<b>Error! Bookmark not defined.</b>
3.5 Baseline Monitoring .....	<b>Error! Bookmark not defined.</b>
3.6 Pilot Studies .....	<b>Error! Bookmark not defined.</b>
SECTION 4 Environmental Setting.....	<b>Error! Bookmark not defined.</b>
4.1 Historical Setting .....	<b>Error! Bookmark not defined.</b>
4.2 Current Land Use.....	<b>Error! Bookmark not defined.</b>
4.3 Potential Future Management and Development Activities	<b>Error! Bookmark not defined.</b>
4.4 Cultural Resources.....	<b>Error! Bookmark not defined.</b>
4.5 Climate.....	<b>Error! Bookmark not defined.</b>
4.6 Relative Sea Level Rise .....	<b>Error! Bookmark not defined.</b>
4.7 Physical Setting.....	<b>Error! Bookmark not defined.</b>
4.7.1 Morphology .....	<b>Error! Bookmark not defined.</b>
4.7.2 Hydrology and Hydrogeology .....	<b>Error! Bookmark not defined.</b>
4.7.3 Sediment Transport Dynamics .....	<b>Error! Bookmark not defined.</b>
4.7.4 Non-CERCLA Stressors.....	<b>Error! Bookmark not defined.</b>
4.8 Ecosystem of the BCSA and Hackensack River Estuary	<b>Error! Bookmark not defined.</b>
4.8.1 Regional Habitats and Communities	<b>Error! Bookmark not defined.</b>

4.8.2	Berry's Creek Habitats and Communities ...	<b>Error! Bookmark not defined.</b>
4.8.3	Marsh Waterway Interactions and the BCSA Food Web.....	<b>Error! Bookmark not defined.</b>
4.9	Human Use Surveys.....	<b>Error! Bookmark not defined.</b>
SECTION 5	Chemical System Characterization .....	<b>Error! Bookmark not defined.</b>
5.1	Distribution of COPCs in BCSA Sediment	<b>Error! Bookmark not defined.</b>
5.2	Surface Water COPCs Distribution .....	<b>Error! Bookmark not defined.</b>
5.3	Biota COPCs Distribution .....	<b>Error! Bookmark not defined.</b>
5.3.1	COPC in Marsh Biota.....	<b>Error! Bookmark not defined.</b>
5.3.2	COPCs in Waterway Biota .....	<b>Error! Bookmark not defined.</b>
5.4	Air COPCs Distribution.....	<b>Error! Bookmark not defined.</b>
5.5	Regional Urban Background .....	<b>Error! Bookmark not defined.</b>
SECTION 6	Integrative Site Characterization.....	<b>Error! Bookmark not defined.</b>
6.1	Sources of COPCs to the BCSA Tidal Area	<b>Error! Bookmark not defined.</b>
6.1.1	Past Sources.....	<b>Error! Bookmark not defined.</b>
6.1.2	Ongoing Sources.....	<b>Error! Bookmark not defined.</b>
6.2	COPC Fate, Transport, and Bioavailability	<b>Error! Bookmark not defined.</b>
6.2.1	Organic Matter and Redox .....	<b>Error! Bookmark not defined.</b>
6.2.2	Chemical Partitioning and Transformation .	<b>Error! Bookmark not defined.</b>
6.2.3	COPC Transport .....	<b>Error! Bookmark not defined.</b>
6.2.4	Advection and Dispersion .....	<b>Error! Bookmark not defined.</b>
6.2.5	Particle Exchange between Sediment and Surface Water .....	<b>Error! Bookmark not defined.</b>
6.2.6	Dissolved Exchange between Sediment and Surface Water .	<b>Error! Bookmark not defined.</b>
6.2.7	Marsh Interflow .....	<b>Error! Bookmark not defined.</b>
6.3	COPC Biouptake and Bioavailability .....	<b>Error! Bookmark not defined.</b>
6.3.1	Waterway and Tributaries .....	<b>Error! Bookmark not defined.</b>
6.3.2	Marshes.....	<b>Error! Bookmark not defined.</b>
6.4	Receptors and Pathways .....	<b>Error! Bookmark not defined.</b>
6.5	Natural Recovery .....	<b>Error! Bookmark not defined.</b>
6.5.1	Marshes.....	<b>Error! Bookmark not defined.</b>
6.5.2	Waterways .....	<b>Error! Bookmark not defined.</b>
6.5.3	Fish .....	<b>Error! Bookmark not defined.</b>
6.5.4	Summary.....	<b>Error! Bookmark not defined.</b>

SECTION 7 Biological and Human Health Risk (Judi). **Error! Bookmark not defined.**

- 7.1 Baseline Human Health Risk Assessment. **Error! Bookmark not defined.**
  - 7.1.1 Receptors and Exposure Pathways **Error! Bookmark not defined.**
  - 7.1.2 Chemicals of Potential Concern ... **Error! Bookmark not defined.**
  - 7.1.3 Risks ..... **Error! Bookmark not defined.**
- 7.2 Baseline Ecological Risk Assessments..... **Error! Bookmark not defined.**
  - 7.2.1 Receptors and Exposure Pathways **Error! Bookmark not defined.**
  - 7.2.2 Chemicals of Potential Ecological Concern **Error! Bookmark not defined.**
  - 7.2.3 Exposures and Effects ..... **Error! Bookmark not defined.**
  - 7.2.4 Risks ..... **Error! Bookmark not defined.**
- 7.3 Risk Conclusions and Significance for Risk Management **Error! Bookmark not defined.**

SECTION 8 Site-Specific Study Questions..... **Error! Bookmark not defined.**

- 8.1 Study Questions Related to Chemical, Physical, and Biological Processes that Define Site-Related Risks..... **Error! Bookmark not defined.**
  - 8.1.1 Study Question 1 (Stressors): What are the major stressors (physical, chemical, and biological) and how are they distributed in relation to the receptors important to defining risk? ..... **Error! Bookmark not defined.**
  - 8.1.2 Study Question 2 (Stressors): What are the stressor sources (current and historical) in relation to the receptors important to defining risk? ..... **Error! Bookmark not defined.**
  - 8.1.3 Study Question 3 (Receptors): What are the key human and ecological receptors important to defining risk and how are they distributed throughout the BCSA? **Error! Bookmark not defined.**
  - 8.1.4 Study Question 4 (Hydrodynamics and Sediment Dynamics): How do water and sediments move into, out of, and within the tidal portion of the BCSA, and what are the spatial and temporal patterns throughout the BCSA?..... **Error! Bookmark not defined.**
  - 8.1.5 Study Question 5 (Chemical Fate and Transport): What are the key physical, chemical, and biological processes controlling the relationships between each stressor, exposure pathway, and ecological and human receptor exposure?... **Error! Bookmark not defined.**
  - 8.1.6 Study Question 6 (Fate and Transport): Is there a potential for changes in the system (natural or anthropogenic) that could affect the type and distribution of stressors, especially chemical fate, transport, and bioavailability?..... **Error! Bookmark not defined.**

8.1.7	Study Question 7 (Risk Assessment): What are the primary CERCLA-relevant COPCs that pose unacceptable risk? How does this risk compare to effects caused by other stressors in the system? How do these risks interact with effects caused by non-chemical stressors?.....	<b>Error! Bookmark not defined.</b>
8.2	Study Questions Related to Remedy Evaluation .....	<b>Error! Bookmark not defined.</b>
8.2.1	Study Question 8 (Remedy Evaluation): What is the ranking of the stressors (legacy sediments, atmospheric deposition, storm water runoff, relative mass loading from distinct tributaries and Hackensack River tidal inputs) with regard to their importance to risk? ..	<b>Error! Bookmark not defined.</b>
8.2.2	Study Question 9 (Remedy Evaluation): What risk reduction is achievable in the BCSA, given regional background contamination, as well as existing non-CERCLA and non-BCSA stressors?	<b>Error! Bookmark not defined.</b>
8.2.3	Study Question 10 (Remedy Evaluation): What is the rate of natural recovery for chemical stressors, and what recovery is anticipated for non-chemical stressors in the absence of CERCLA-related remedial activity? .....	<b>Error! Bookmark not defined.</b>
8.2.4	Study Question 11 (Remedy Evaluation): What are potential remedial measures to reduce CERCLA-relevant risk by 1) source control, 2) reducing exposure pathways, and 3) reducing bioavailability? .....	<b>Error! Bookmark not defined.</b>
8.2.5	Study Question 12 (Remedy Evaluation): What net reductions in risk would be associated with alternative remedial measures (or combinations of these), in terms of both reducing the net risk levels and decreasing the time required to reach specified risk levels? How would these enhance the overall use (or value?) of the BCSA, consistent with long-term planning for the New Jersey Meadowlands? .....	<b>Error! Bookmark not defined.</b>
SECTION 9 References .....		<b>Error! Bookmark not defined.</b>

## LIST OF APENDICES

Appendix A	USEPA Comment Response Summary
Appendix B	Chronology of Natural and Anthropogenic Events
Appendix C	Summary of Site Investigations
Appendix D	Urban Hydrology
Appendix E	Surface Water Characterization
Appendix F	Sediment Characterization

Appendix G	Hydrodynamics and Sediment Transport
Appendix H	Chemical Conceptual Site Models
Appendix I	Biological Characterization
Appendix J	Reference Areas/Regional Background
Appendix K	Data Validation and Handling Summary
Appendix L	Baseline Ecological Risk Assessment
Appendix M	Baseline Human Health Risk Assessment
Appendix N	Atmospheric Exchange and Mercury Monitoring Studies

## LIST OF TABLES

Table 1	Summary of RI Samples Collected, 2008–2015
Table 2	Morphologic Areas (Acres) by Tidal Reach in BCSA
Table 3	Comparison of Freshwater Volume to Tidal Volume
Table 4	Habitat Types of the BCSA
Table 5	Percent Abundance for Most Abundant Invertebrate Taxa across BCSA and Reference Site Marshes Based on Phase 2 Sampling
Table 6	Marsh Invertebrate Community Richness and Diversity by Habitat Type and Reach
Table 7	Total Count and Percent Abundance of Fish Species Caught in the BCSA during Phase 1 and Phase 2 Summer Community Surveys
Table 8	Benthic Taxa Abundance (% of Total Counts) in BCSA Reaches and Reference Areas
Table 9	Median Total Mercury Concentrations (mg/kg) by Morphology in Surface Sediment in UPIC and BCSA Tidal Zone Reaches
Table 10	Median Total PCB Concentrations (mg/kg) by Morphology in Surface Sediment in UPIC and BCSA Tidal Zone Reaches
Table 11	Median Methyl Mercury Concentrations (µg/kg) by Morphology in Surface Sediment in UPIC and BCSA Tidal Zone Reaches
Table 12	Median Concentrations (µg/L) of Primary COPCs in Conventional Surface Water Samples
Table 13	Median COPC Concentrations in <i>Phragmites</i> Roots and Leaves in BCSA Marshes
Table 14	Median COPC Concentrations in <i>Phragmites</i> Leaves and Detritus in BCSA Marshes
Table 15	Median COPC Concentrations in Marsh Invertebrate Taxa within BCSA Marshes
Table 16	Median COPC Concentrations in Waterway Taxa within BCSA
Table 17	Air Monitoring Data by Sampling Date and Reach (mean / standard deviation; in ng/m <sup>3</sup> )
Table 18	Mercury Air Concentrations by Reach across All Sample Dated (in ng/m <sup>3</sup> )
Table 19	Average Organic Matter Concentrations in BCSA Sediment and Suspended Particulate
Table 20	Summary of Hazard Index and Lifetime Cancer Risk for Angler Consuming BCSA Fish
Table 21	Assessment Endpoints and Receptors for BERA by BCSA Habitat
Table 22	Number of COPCs by Receptor Group
